Preamble

In today's world, technology, ideas, and events converge quickly and continuously, creating both challenges and opportunities.

To thrive in this dynamic environment emerging new man-power will need to learn new skills.

Studies by Stanford Research Institute and the Carnegie Mellon Foundation among Fortune 500 CEOs found that 75% of long term job success depended on **PEOPLE SKILLS** and only 25% on TECHNICAL SKILLS.

We at MRH Enterprise help employees of your company to learn various people skills.

We empower them to use imagination, develop creative solutions, remain flexible and motivate others to turn their ideas into results that make a difference to business.

Our Methodology

Looking to the requirement of the present era, we proposes two model for training,

- Micro Training Modules (MTM) at clients premises
- Full day seminars / workshops out of the company premises.

Micro Training Module (MTM)

In the time bound work culture, it has become difficult to make the employee available for the training for the long duration. At the same time, importance of training for the employee can not be ignored. In this situation to balance both the requirement we designed Micro Training Modules (MTM) of 3-4 hours which will provide essence of a subject to employee. Moreover, conduction of these MTMs will be at your premises only, which can save time as well as cost to the company

Full Day Seminar / Workshop

These programmes are 1- 2 day programmes which can be conducted at your premises but preferably to be conducted out of premises. This programme covers details and practice for the subjects.

Our Vision

To provide Excellent Training Services to Industries and Students, with a Learner centric, dynamic and innovative approach to produce excellent Mechanical Engineering professionals, who will be lifelong learners and can compete globally.

Our Mission

To be a premier Training Institute in providing high-quality, affordable and accessible training programmes to facilitate the learner for his best personal and professional development
